DIRECT COSTS INPATIENT TREATMENT OF HYPERTENSION ONE OF HOSPITAL IN SOUTH JAKARTA

Lili Musnelina, Septi Mailinda Yusuf

Department of Pharmacy, Institute of Science and Technology of National, Jakarta, Indonesia
musnelina@gmail.com

INTRODUCTION

Hypertension is a condition in which a person experiences an increase in blood pressure above normal resulting in morbidity and mortality. Data from epidemiologic hypertension in Indonesia from year to year tend to increase. Assessment of hypertension treatment costs largely unknown and not yet widely applied.

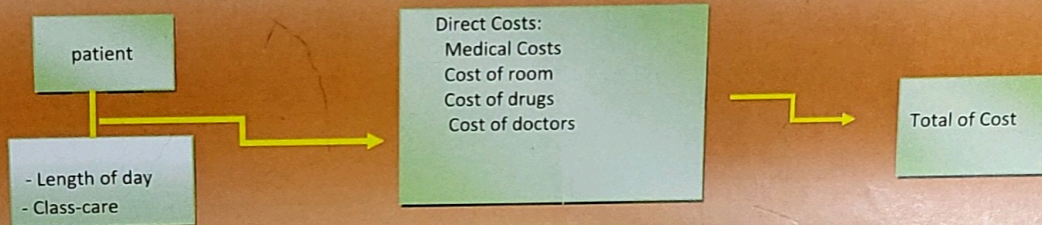

RESEARCH OBJECTIVES

To assess the direct cost for treatment of hypertension

RESEARCH METHODOLOGY

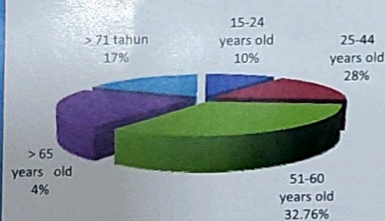

Descriptive retrospective method used by looking at secondary data is medical records to see the condition of clinic patients and a memorandum of payment of ovarian cancer patients hospitalized at one of Hospital in east Jakarta period April 2008 - Mei 2009

CONCEPT OF FRAMEWORK

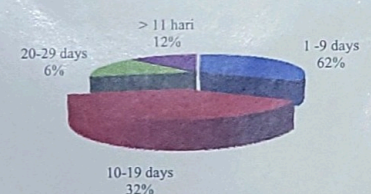

RESULTS

Distribution of respondents by ages

Variables	Total Cost of Treatment (IDR.)	Average cost / patient (IDR.)	The average cost / patient / day (IDR.)
the room	93.576.000	280.167,7	4.830.5
cost of doctors	49.705.300	148.818.3	2.565.7
cost of Drugs	297.860.400	891.797,6	15.375,8
The cost of medil action	177.037.100	530.051.2	9.138.7
Total	618.179.000	1.850.835	31.911

Distribution based on the long treatment

CONCLUSION

The high cost of treatment and the existence of price differences in the treatment of patients with hypertension can be caused by different patient conditions and already at an advanced stage.

Total cost of treatment for all patients is equal IDR. 618.179.000, -. which consists of the room, physician fees, drug costs and expenses of medical action. The average cost is the biggest cost of drugs cost IDR 15.375.8,-patient/ day. The average cost of treatment per patient / day amounting to IDR. 31.911,-

SURAT KETERANGAN

Nomor: 59/H2.F10/PPM.00.02/2010

Setelah menelaah usulan dan protokol penelitian di bawah ini, Komisi Ahli Riset Fakultas Kesehatan Masyarakat Universitas Indonesia, menyatakan bahwa penelitian dengan judul :

“Biaya Langsung Pengobatan Hipertensi”

Lokasi Penelitian : RS Fatmawati Jakarta
Waktu Penelitian : Januari – Maret 2010
Responden : Pasien Hipertensi
Peneliti Utama : Lili Musnelina, Septi Mailinda

Telah melalui prosedur kaji etik dan dinyatakan layak untuk dilaksanakan

Demikianlah surat keterangan lolos kaji etik ini dibuat untuk diketahui dan dimaklumi oleh yang berkepentingan dan berlaku sejak 12 Januari 2010 sampai dengan 12 Januari 2011.

Depok, 12 Januari 2010

Sekretaris,

Prof. Dr. dr. Sudijanto Kamso, SKM
